Product description

Norilsk Nickel Sulphate Standard Grade is made from the same raw materials as the Company's primary nickel metal and is characterised by high purity and consistent quality.

Controlled particle size and an integral pouring lip in the bag enhance free-flowing characteristics.

Norilsk Nickel Sulphate Standard Grade is widely used for decorative and engineering nickel plating.

NORNICKEL sulphate production is in compliance with ISO 9001:2015, ISO 14001:2015, ISO 45001:2018.

One of the lowest carbon footprint in the industry.
