Product description

Norilsk Nickel's Hydroxycarbonate Powder is produced in Harjavalta, Finland, in the world's most modern nickel chemical factory. It is characterized by high purity and consistent quality.

Nickel Hydroxycarbonate Powder is a product with light green colour and fine particle size. It is water-insoluble, but soluble in acids. The product is made under automated process control to ensure the high and stable quality. It is mainly used in catalysts and ceramics.

NORNICKEL Nickel Hydroxycarbonate production is in compliance with ISO 9001:2015, ISO 14001:2015, ISO 45001:2018.

One of the lowest carbon footprint in the industry.
